Subject: AK Steel update

Update on AK Steel Middletown

Ohio called to say that they are soon sending an interim Order. The Order will instruct AK Steel to:

- Perform 14 days of Summa testing and submit results
- Perform any immediate action to reduce benzene emissions
- Comply with leaking door rule
- Ensure subpart FF, BWON Initial Notice of Compliance contains the tar decanter
- Install digital cameras for viewing coke oven
- Revise O&M plan
- Hire third party consultant to ensure title V compliance

They will not mention nuisance or health. Ohio will consider sending another Order for additional measures if needed.
